PROFILE

Detail-oriented Data Analyst with hands-on experience in the tourism & travel sector, backed by a solid foundation in Physics & Computer Science. Proven track record of building end-to-end analytics projects across Finance, HR, and Retail. Proficient in data collection, cleaning, and creating interactive dashboards using Power BI, SQL, and Excel to deliver actionable business insights. Skilled in ensuring data accuracy and collaborating with cross-functional teams to support data-driven decision-making.

EDUCATION

Bachelor of Physics and Computer Science 2024
Faculty Of Sciences

EXPERIENCE

Data Analyst & Operations Specialist 04/2026 – Present
Kayan Travel shebeen El-Kom / Egypt

- System & Visa Operations: Managed end-to-end visa processing on the Nusuk platform and Safa files, overseeing visa retrievals and coordinating directly with field representatives for delivery.
- Financial Data Analysis: Analyzed operational expenses by tracking and auditing total costs related to accommodation (housing), catering, transportation, and visa issuance.
- HR Data Analytics: Modeled HR datasets to analyze workforce distribution across departments, salary structures, overtime compensation, and hourly rate efficiency per employee.
- Business Reporting: Built structured Excel reports to present combined operational and financial insights, helping management optimize budgets and streamline workflow.

Administrative Officer - Engineering Authority 10/2024 – 11/2025
Egyptian Armed Forces Egypt

- Coordinated administrative and documentation operations within a structured military-engineering environment.
- Assisted in analyzing operational data and preparing official technical reports, documentation, and presentations using Microsoft Word, Excel, and PowerPoint.
- Maintained data accuracy and reporting standards across official administrative records, ensuring consistency and reliability.

PROJECTS

HR Analysis Dashboard - Power BI 03/2026

- Developed a 3-page interactive Power BI dashboard to analyze employee attrition and support data-driven HR decisions across a dataset of 1,470 employees and \$9.6M in total payroll.
- Cleaned and pre-processed raw HR data using Power Query, developed complex DAX measures, and designed an intuitive interface with interactive slicers filtering by Department, Job Role, Business Travel, and Education Field.
- Identified a 16% attrition rate (237 employees), revealed overtime employees were 54% more likely to leave, and analyzed workforce demographics (avg age: 37, 60/40 gender ratio, avg tenure: 7 years) — enabling targeted HR retention strategies.

Retail Sales Analysis – Excel 03/2026

- Analyzed a Superstore dataset spanning 4 years (2010–2013) across 4 regions and 130,064 total orders to identify regional sales trends and the impact of discount strategies.
- Processed \$8.6M in total sales and \$2.4M in total profit, identifying the Central region as the highest-performing region with 31% of total orders and uncovering \$1.15M in total losses to highlight cost-saving opportunities.
- Built dynamic Pivot Tables to summarize sales, net profit, and shipping costs by year and product category, and designed a professional Excel dashboard using Slicers and Pivot Charts to visualize top-performing products and regional performance — with Regular Air (75%) identified as the dominant shipping mode.

CERTIFICATES & COURSES

Google Data Analytics Professional Certificate 07/2026
Coursera

- Completed an intensive 9-course program covering end-to-end data analysis, data cleaning, analysis, and visualization using Spreadsheets, SQL, Tableau, and Python.

Professional Data Analysis Diploma 12/2025 – 04/2026
Machinify Academy

- Gained practical proficiency in Excel (Pivot Tables, advanced functions), SQL (querying, CTEs, window functions), Python (data manipulation), and Power BI (DAX, Power Query, dashboard design) through real-world projects and case studies.
